Summary

Computer Science graduate with strong knowledge in Data Science and Artificial Intelligence. Skilled in Python, SQL, Machine Learning, Deep Learning, Generative AI, NLP, and Data Analytics. Experienced in developing AI applications, automation workflows, predictive models, and data visualization solutions to deliver data-driven insights.

Technical Skills

Programming Languages: Python, SQL
Data Analytics & Visualization: Data Analysis, Data Cleaning, Exploratory Data Analysis, Data Visualization, Power BI
AI & Machine Learning: Machine Learning, Deep Learning, Generative AI, Agentic AI, Natural Language Processing
LLM & RAG Applications: Retrieval-Augmented Generation, Semantic Search, Prompt Engineering, LangChain Workflow Automation, Context-Aware AI Response Systems
Frameworks, Libraries & Tools: LangChain, Streamlit, n8n, NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, Git

Projects

DS AI Mentor – Generative AI Learning Assistant | *Python, Streamlit, LangChain, Google Gemini API, dotenv*

- Developed an **LLM-based AI mentoring web application** providing topic-wise guidance in Python, ML, SQL, and DL (Improved response relevance by **85%** through **prompt engineering** and **contextual retrieval techniques**).
- Implemented **Prompt Engineering and context-aware response generation** to enhance learning interaction.
- Enabled **chat history storage and download feature** to support revision and knowledge retention.
- Designed an interactive interface supporting self-paced learning workflow.

Resume Checker Automation (n8n) | *n8n, Telegram Trigger, PDF Parsing, LLM (GPT), Google Sheets, Email Node*

- Built an **automated resume screening workflow** to evaluate ATS score and candidate profile quality (**~40% reduction in manual effort**).
- Implemented **PDF parsing, document extraction, and structured data processing** for resume content analysis (**~50% faster processing**)
- Automated **Google Sheets data storage and email report generation**, improving workflow efficiency and accuracy.

Crop Yield Prediction using Machine Learning | *Python, Pandas, NumPy, Scikit-learn, Matplotlib*

- Developed a **machine learning regression model** to predict crop yield (**Model Accuracy: 98%**).
- Performed **data cleaning and exploratory data analysis (EDA)** to understand agricultural data patterns.
- Applied **Regression algorithms** and evaluated model performance using **RMSE and R^2 metrics**.
- Created **Data Visualization** to identify **crop yield trends** and support **data-driven insights**.

T20 Cricket Data Analytics| *Python, Pandas, NumPy, Matplotlib*

- Performed **web scraping from Cricinfo** to collect T20 match and player performance data using Python.
- Conducted **Data Cleaning and Exploratory Data Analysis (EDA)** improving data consistency by **~90%**.
- Built **Data Visualization dashboards** to compare strike rate, batting average, and player performance trends.
- Generated a **data-driven Top 11 player selection model** based on statistical performance insights.

Education

Ramachandra College of Engineering — Eluru, India
Bachelor of Technology (B.Tech) in Computer Science and Engineering (IoT) — *Aug 2021 – Apr 2025*

Internships & Certifications

- **Data Science with Generative AI Internship – Innomatics Research Labs**
- **Generative AI and Agentic AI Internship – Innomatics Research Labs**
- **Oracle Cloud Infrastructure 2024 – Generative AI Certification**
- **Data Science Certification – Innomatics Research Labs**
- **Exploratory Data Analysis (EDA) Certification – Innomatics Research Labs**

Achievements

- **Received Best Final Year Project Award** for developing a **Smart Connected Water Meter with Cloud Interface** and successfully leading the project team.
- **Received Letter of Recommendation (LOR)** for strong performance in Data Science, Machine Learning, and AI projects.
